

Objectives of the Course

The student will be able to learn basic posture, grip and sound production techniques for the individual instrument; apply simple technical exercises; play beginner level pieces.

Course Contents

This course includes basic posture, grip and sound production techniques for the individual instrument, simple technical exercises and playing beginner level pieces.

Recommended or Required Reading

The resources to be used in this course include applied materials that can be adapted according to the characteristics of the instrument, including posture, grip, sound production, scales, etudes and beginner level works that aim to support basic technical development for all individual instruments. These materials consist of the repertoire determined by the instructor conducting the related individual instrument course.

Planned Learning Activities and Teaching Methods

One-to-one Practical Training Face-to-face individual instrument lessons that focus on the individual development of the student. **Demonstration** The method in which the student is asked to apply the techniques demonstrated by the instructor on the instrument one-to-one. **Question and Answer** A method that allows the student to think about technical or musical details and to participate actively. **Repetition and Reinforcement** Applications made through regular repetition to ensure the permanence of the information learned. **Problem Solving Method** Analyzing and resolving technical or musical difficulties. **Constructivist Approach** Students gain awareness by taking an active role in their own learning process. **Cognitive Methods** Conceptual understanding and analysis of musical structures (scale, interval, nuance, form, etc.).

Recommended Optional Programme Components

Daily individual practice is recommended to progress on the instrument.
