

## UTL406 - ENTREPRENEURSHIP AND INNOVATION MANAGEMENT - İktisadi ve İdari Bilimler Fakültesi - Uluslararası Ticaret ve Lojistik Bölümü

### General Info

#### Objectives of the Course

This course aims to enable students to understand different business models and strategies within the entrepreneurial ecosystem, gain innovation management skills and implement entrepreneurial thinking. Students will explore different entrepreneurial paths such as taking on entrepreneurial risk on their own, purchasing or running an existing business, franchising and startup culture. In addition, students will be able to understand the dynamics of the modern business world by focusing on current issues such as corporate innovation, social entrepreneurship and sustainable business models, as well as the differences between large and small companies in different industries.

#### Course Contents

Entrepreneurial Thinking and Risk Management: To encourage students to take entrepreneurial risks by developing their own business ideas. To raise awareness about risk management strategies and the culture of learning from failure. Different Entrepreneurship Models: To understand the processes of purchasing or operating an existing business. To analyze the advantages and disadvantages of entrepreneurship through franchising (concession agreements). To examine startup culture and technology-based entrepreneurship models. Differences Between Large and Small Companies: To compare the innovation processes of large companies with the entrepreneurial dynamics of small and medium-sized enterprises (SMEs). To understand the interaction between corporate entrepreneurship (intrapreneurship) and startups. Innovation and Sustainability: To provide innovation management and creative problem-solving skills. To raise awareness about sustainable business models and social entrepreneurship. Practical Applications and Project-Based Learning: To enable students to produce solutions to real-world problems. To provide practical skills such as preparing a business plan, developing an MVP (Minimum Viable Product) and designing a business model. Sectoral Connections and Mentorship: To enable students to gain sectoral experience by interacting with successful entrepreneurs and innovation experts from the sector. To support students in taking steps towards their career goals with mentoring programs and networking opportunities.

#### Recommended or Required Reading

#### Presentation Of Course

The Entrepreneurship and Innovation Management course is supported by theoretical explanations and practical studies. After creating a conceptual framework on basic concepts such as entrepreneurship processes, innovation management, business model development, startup culture and sustainable growth strategies, successful initiative examples in the sector, case studies and innovative applications are discussed. Interactive discussions, case studies and project-based learning methods are used to help students better understand the subjects. In addition, students are aimed to develop their own business ideas, design business models and put innovation strategies into practice, thus gaining sectoral skills in the field of entrepreneurship and innovation.
