KMY375 - POLITICAL ECOLOGY - İktisadi ve İdari Bilimler Fakültesi - Kamu Yönetimi Bölümü

General Info

Objectives of the Course

In this course, different types of environmental thought will be discussed by considering how they approach society-nature relations, how they approach environmental degradation, what kind of ethical understanding and political solutions they propose, and their interactions and conflicts with traditions of political thought and with each other.

Course Contents

The scope of this course includes topics such as the historical roots of green thought and the intellectual experiences of how ecology is related to socialism, liberalism, anarchism, nazism, and feminism.

Recommended or Required Reading

Textbook, Whiteboard, and Projector

Planned Learning Activities and Teaching Methods

Straightforward Explanation (Takrir) Method and Discussion Method

Recommended Optional Programme Components

1. Bahro, R. (1989) Nasıl Sosyalizm? Hangi Yeşil? Ne İçin Sanayi? Der. ve Çev. T. Bora, İstanbul, Ayrıntı. 2. Bookchin, M. (1996) Ekolojik Bir Topluma Doğru, Çev. A. Yılmaz, İstanbul, Ayrıntı. 3. Çoban, A. (2012) 'Ekolojik Tartışmalar Bakımından Marx'ın Düşüncesinin Değeri', Kurtuluş, Sayı 2, 93-104. 4. Dobson, A. (1990) Green Political Thought, London and New York, Routledge. 5. Fitz, D. (2005) 'Yeşil Ekonomi Asla Piyasa Ekonomisi Olamaz', Üç Ekoloji, Sayı 4 (Güz) 106-115. 6. Tamkoç, G. (der) (1994) Derin Ekoloji, İzmir, Ege Yayıncılık.

Instructor's Assistants

There is no assistant teaching staff.

Presentation Of Course

Face to face/Theoretical

Dersi Veren Öğretim Elemanları

Dr. Öğr. Üyesi Sabriye Ak Kuran

Program Outcomes

1. The place of green thought in the history of political ideas is determined.
2. Intellectual knowledge is gained about the perspectives of different ideologies on ecological issues and their proposed solutions.
3. Defines the core principles, political objectives, and policy proposals of green ideology and relates them to other environmentalist approaches.
4. Comparisons are made among environmental approaches within political ecology.
5. Power, domination, and inequality relations in the emergence of environmental problems are analyzed.
